

1. Product Description

KPL Zinc Carbonate is a high-purity white powder used as a **zinc source** in rubber compounding, ceramic glazes, flame retardants, and as an intermediate in the production of zinc oxide. It decomposes cleanly on heating to yield pure ZnO and CO₂.

2. Typical Properties

Parameter	Typical Value
Chemical Name	Zinc Carbonate
Molecular Formula	ZnCO ₃
CAS Number	3486-35-9
Appearance	White fine powder
Zinc Carbonate (ZnCO ₃)	≥98%
Zinc (as Zn)	~52%
Loss on Ignition (300°C)	~35–40% (due to CO ₂ release)
pH (10% aqueous suspension)	6.5 – 7.5
Specific Gravity	~4.4
Particle Size (D50)	2–10 microns (typical)
Solubility in Water	Insoluble
Heavy Metals (as Pb)	<20 ppm

Note: Exact specifications can be tailored to application requirements.

3. Applications

- Precursor for high-purity zinc oxide
- Rubber vulcanization activator (alternative to ZnO)

- Ceramic and glass frits
 - Flame retardant synergist in polymers
 - Feed and fertilizer additive (zinc source)
-

4. Packaging

- 25 kg multi-wall paper bags with inner PE liner
 - Bulk packaging (500–1000 kg) available on request
-

5. Storage & Handling

- Store in dry, cool, and well-ventilated area
 - Keep containers tightly closed to prevent moisture absorption and CO₂ exchange
 - Shelf Life: 24 months under proper storage
-

6. Quality Assurance

Produced under ISO 9001:2015 certified processes at Kesar Petroproducts' Ratnagiri manufacturing facility.
