

1. Product Description

KPL Zinc Sulphate Heptahydrate is a **highly soluble zinc micronutrient fertilizer** used to correct zinc deficiency in crops like rice, maize, wheat, citrus, and paddy. It provides **21% zinc (Zn)** and **11% sulphur (S)** in a plant-available form.

2. Typical Properties

Parameter	Typical Value
Chemical Name	Zinc Sulphate Heptahydrate
Molecular Formula	$\text{ZnSO}_4 \cdot 7\text{H}_2\text{O}$
CAS Number	7446-20-0
Appearance	White to off-white crystalline granules or powder
Zinc (Zn)	$\geq 21.0\%$
Sulphur (S)	$\sim 11.0\%$
pH (5% aqueous solution)	4.0 – 5.0
Water Solubility	$\geq 98\%$
Moisture Content	$\leq 3.0\%$
Granule Size	0.5–2.0 mm (for granular grade)
Heavy Metals (as Pb)	< 20 ppm
Arsenic (As)	< 3 ppm

Conforms to Fertilizer (Control) Order, India specifications for Zinc Sulphate.

3. Applications

- Soil application (basal or top-dressing)
- Foliar spray (0.5% solution)
- Seed treatment
- Fertigation systems
- Ideal for zinc-deficient soils (common in high-pH, calcareous, or intensively cropped regions)

4. Packaging

- Standard: 25 kg HDPE-lined PP bags (moisture-resistant)
 - Bulk: 500–1000 kg jumbo bags available
-

5. Storage & Handling

- Store in dry, cool, covered area
 - Keep away from alkaline materials (e.g., lime, DAP) to prevent precipitation
 - Shelf Life: 18 months if sealed and protected from humidity
-

6. Quality Assurance

Manufactured under **ISO 9001:2015** at Kesar Petroproducts' Ratnagiri facility. Each batch tested for Zn content, solubility, and heavy metals.
