

1. Product Description

KPL Mono-Ammonium Phosphate (MAP) is a **chloride-free, acidic NP fertilizer** containing **11% Nitrogen (N)** and **52% P₂O₅**, ideal for crops sensitive to chloride or high pH (e.g., potatoes, tobacco, fruits).

2. Typical Properties

Parameter	Typical Value
Chemical Name	Mono-Ammonium Phosphate
Molecular Formula	NH ₄ H ₂ PO ₄
CAS Number	7722-76-1
Appearance	White to greyish free-flowing granules
N (as Nitrogen)	11.0% min
P ₂ O ₅ (as Phosphorus)	52.0% min
pH (1% aqueous solution)	4.0 – 4.5
Moisture Content	≤1.0%
Granule Size	2–4 mm (≥90% retained)
Bulk Density	0.8–0.9 g/cm ³
Water Solubility	≥99%
Free Acid (as H ₃ PO ₄)	≤0.3%

Meets Fertilizer (Control) Order specifications of India.

3. Applications

- Starter fertilizer for row crops (corn, soybean)
- Blending component in NPK complexes
- Fertigation and foliar programs (with soluble grade)
- Preferred in chloride-sensitive crops and acidic soils

4. Packaging

- Standard: 50 kg HDPE-lined PP bags
 - Optional: 25 kg retail packs, bulk (500–1000 kg)
-

5. Storage & Handling

- Store in dry, covered warehouse
 - Shelf-stable for 18–24 months if protected from moisture
 - Avoid mixing with alkaline materials (e.g., lime, calcium nitrate)
-

6. Quality Assurance

Produced under **ISO 9001:2015** at Kesar Petroproducts' Ratnagiri facility. Rigorous in-process and final QC for nutrient content and physical properties.
